Who is this surgeon and what makes him or her think they are approved to remove a mass other than the shoulder lesion or repair a hernia. Neither of these were requested or approved and will not be paid for.

Dr. Narkiewicz repaired a hernia and removed a mass both of which were not approved. The surgeries approved were removal of a lesion near the eye and a skin lesion on the shoulder. The hernia and mass removal should not be paid for. This is a general surgeon with Allegiance general surgery. There was a consult before the surgery request and approval and the following is what was requested and approved. "inferior r eye lesion bx and excision of r shoulder lesion".
